

Based on our long-term experience as approved company providing vocational training, we have already written many success stories.

Start your own success story with us and apply for:

Electronics engineer (m / f / d) for automation technology (or electrician for industrial engineering)

Training site:	Schalkau
Duration of training:	3,5 years (or 2 years)
Start of training:	August
professional school:	Eisenach (or Sonneberg)
Inter-company courses:	SAZ Sonneberg

Profession characteristics:

- Analyze functional relationships and processes of automated systems
- Designing feature changes or enhancements
- Installing and adjusting electrical, hydraulic or pneumatic drive systems
- Installation of measuring, control and control equipment
- Assemble, configure, program and adjust sensor systems, operating systems, bus systems and networks
- Connecting the installed components with complex automation equipment, checking the functionality and instructing future users

Your personal attributes:

- Good secondary school certificate or university entrance qualification
- Good grades in maths, physics, engineering, English and computer science
- Interest in technology, computer science and manual skills
- Care, team spirit and enjoy technical challenges

After educational training:

The close collaboration with known schools and vocational institutions is connected with the objective to offer trainees a permanent position after successful completion of their training.

Additionally, we offer multifold possibilities to develop individually and to qualify for responsible tasks, such as:

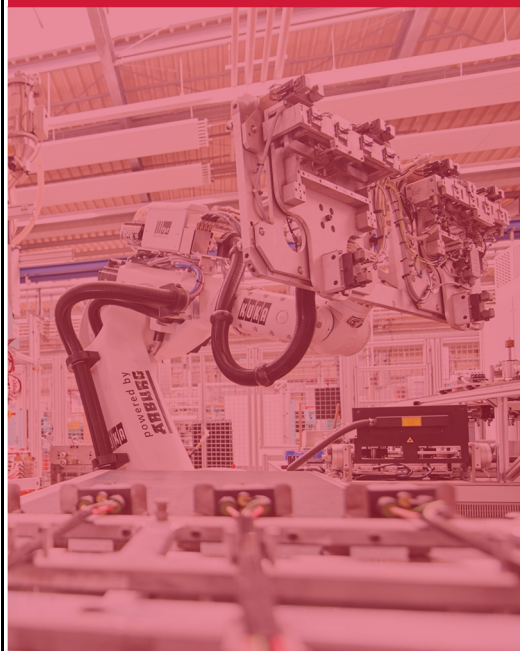

- Industrial technician
- Technician
- Bachelor of Engineering

ELEKTRA with its circa 900 employees is an innovative global acting automotive supplier with locations in South Thuringia and Poland.

As development supplier and carrier of technology of electro-mechanic components for safety engineering and environmental engineering for leading system providers as well as in the area of surface finishing in day/night design we are a competent contact for our customers.

Decisive competences for this are control of innovative production techniques and highly efficient assembly solutions.

We look forward to your convincing **ONLINE-APPLICATION**.
