

Due to our many years of experience as a practice partner for dual study programs, we have already written many success stories.

Start your personal success story with us and apply for

Vocational training with integrated studies (BISS), specializations:

Mechatronic or industrial mechanic (m / w / d) Bachelor of Science / Electrical Engineering and information technology

Training site:	Schalkau
professional school:	Sonneberg
University:	FH Schmalkalden
Duration of training:	5 years (9 semesters)
Start of training:	August
Inter-company courses:	SAZ Sonneberg
Type:	Vocational training integrating study

Procedure:

Vocational training with an integrated degree program in electrical engineering is offered by Elektra as an alternative training option.

During the first two and a half years, in addition to part of the undergraduate studies, you also complete an apprenticeship as a mechatronic or industrial mechanic (m / f). During this time, you change from week to week between the FH Schmalkalden, the training company and the vocational school. After an examination in front of the IHK South Thuringia one receives a professional qualification.

This is followed by the full-time study of 2.5 years. After passing the diploma exam, you obtain the university degree as Bachelor.

Your profile:

- General university entrance qualification or advanced technical college certificate
- Good grades in maths, physics, engineering and computer science
- Interest in technology and craftsmanship
- Care, team spirit and enjoy technical challenges

After the education:

We pursue our dual courses of study with the goal of enabling interested and committed students a practical and successful university degree, thus optimally preparing them for a qualified position and taking on a permanent employment relationship after graduation.

In addition, we offer a variety of opportunities to develop individually and to qualify for tasks of increasing responsibility.

ELEKTRA with its circa 900 employees is an innovative global acting automotive supplier with locations in South Thuringia and Poland.

As development supplier and carrier of technology of electro-mechanic components for safety engineering and environmental engineering for leading system providers as well as in the area of surface finishing in day/night design we are a competent contact for our customers.

Decisive competences for this are control of innovative production techniques and highly efficient assembly solutions.

We look forward to your convincing **ONLINE-APPLICATION.**
