

Due to our many years of experience as a practice partner for dual study programs, we have already written many success stories.

Start your personal success story with us and apply for
Dual degree to Bachelor of Engineering, specialization:

Technical computer science

Training site:	Schalkau
University:	University of Applied Sciences Gera
Duration of training:	3 years (6 semesters)
Start of training:	01. October
Inter-company courses:	SAZ Sonneberg
Type:	practice-integrated study with changing theoretical and practical phases

Course content:

Study of technical computer science imparts classic subjects of computer science such as software development, data bank management, computer architecture and systems software as well as basics of computer science. In a deepening main training subjects such as technical computer science, microprocessor technology and programming close to the physical hardware with subjects of communication technology and data transfer. The spectrum of training topic is being completed by topics from areas engineering mathematics, electronic and electric, digital technology and project management.

Graduates are being qualified to think conceptual, analyse technical problems and generate solutions together with connected economical contexts. Graduates of this field of study can work as software engineer or system administrator, as project manager or in the field of development of gateways among various complex IT-systems. As practical engineers they are able to take responsibility as experts and management staff in companies.

Your profile:

- General university entrance qualification or advanced technical college certificate
- Good grades in maths, physics, engineering and computer science
- Interest in scientific and technical topics
- Care, team spirit and enjoy technical challenges

After the education:

We pursue our dual courses of study with the goal of enabling interested and committed students a practical and successful university degree, thus optimally preparing them for a qualified position and taking on a permanent employment relationship after graduation.

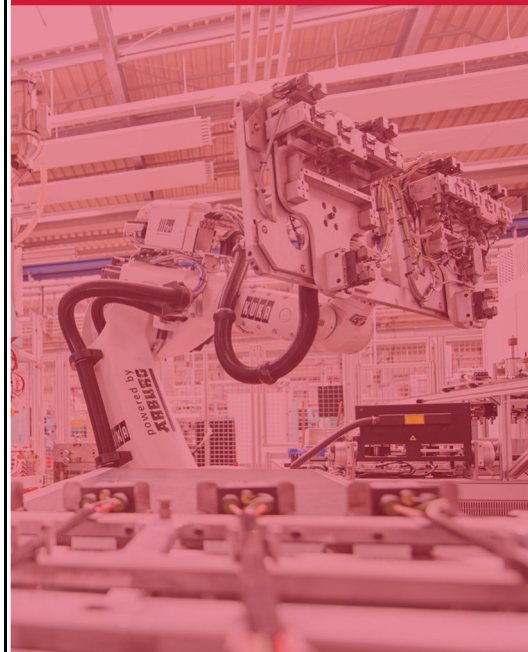

In addition, we offer a variety of opportunities to develop individually and to qualify for tasks of increasing responsibility.

ELEKTRA with its circa 900 employees is an innovative global acting automotive supplier with locations in South Thuringia and Poland.

As development supplier and carrier of technology of electro-mechanic components for safety engineering and environmental engineering for leading system providers as well as in the area of surface finishing in day/night design we are a competent contact for our customers.

Decisive competences for this are control of innovative production techniques and highly efficient assembly solutions.

We look forward to your convincing **ONLINE-APPLICATION**.
